NOTE TO:

FROM:

SUBJECT: CIA Appeal

I don't agree with all of our recommendations in this appeal response and think some additional observations would be helpful:

1. The NFAC position enhancements and SAFE are the only things that we are doing that involve additional money for production. We should remind the DCI that the PRC(I) and Brzezinski care very much about this and that the symbolism of these moves and the adjustments we are making in INR and DoE are important to us.

2. The [] upgrade is an issue which only he can decide and it relates to his priority for the mission.

3. The positions in jeopardy analysis is still murky. What is the base which we are assuming? How does it relate to our broader decision? And where are we going to find the increment for FBI counterintelligence if not from CIA?
